Program Offerings

About GrantSolutions Program Offerings

GrantSolutions Program Service offerings support the mission-driven and complex work of Program Offices in the administration of grant programs. The offerings provide a suite of services that can be used as a comprehensive approach to establish performance measures, collect performance data, analyze results and report on program outcomes. The services can also be used individually (for example, collection of performance data, analyzing performance data, or creating data visualizations/reports).

Benefits of Program Services

› Monitor and provide oversight of grant programs and projects from within GrantSolutions to provide a seamless transition from award to post-award activities.

› Enables pre-population of Grant Recipient data for performance reporting and communication, eliminating data entry errors.

› Eliminates the need to transfer and update management award data between grant award and grant monitoring tools.

› Gain greater insight into work activities and grant project performance as soon as performance data is submitted through GrantSolutions dashboards and business intelligence tools.

› Demonstrate the value of grant program investments by capturing and analyzing the performance data that tells the story of grant programs.

› Collaborate with Recipients using an online case management tool that facilitates project planning, assessment, and oversight throughout the grant lifecycle.

About GrantSolutions

GrantSolutions is a leading national grants services provider, managed by HHS, supporting the full Federal grant life cycle across 10+ Cabinet-level and independent Partner agencies. GrantSolutions Partners have worked together to encourage better use of data to drive more efficient and effective grants management practices and improve the return on the Federal taxpayer investment.

Performance Measurement and Design

Access to experts who can assist with performance measurement design and assessment of current performance measures. Examine program purpose, achievements and impacts to assist with capturing Program Outcomes. Identify potential program benchmarks, economic models, data sources and opportunities for enhanced data analysis to assist Program Offices in "Telling the Story" of program impact and success.

› Program Discovery & Literature Review

› Analyze Performance Data & Enhanced Reporting

› Recommendations to Improve Business Processes and Workflow

› Review available Performance Data

› Recommend Program Performance measures and Outcomes to capture Program impact

Application Evaluation and Processing

Technology and Support services that support peer reviewer recruitment and application evaluation to help identify the most successful grant applicants.
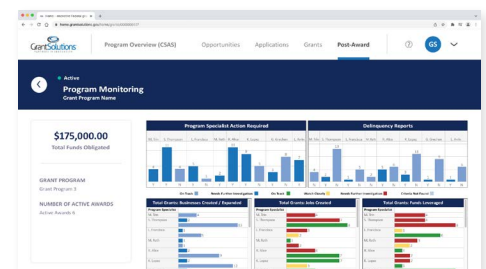

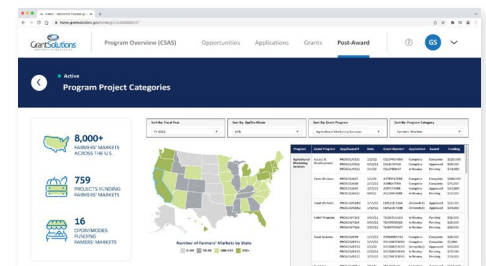

Provides an all-inclusive solution to manage the grant application evaluation (Peer Review) process for a grant-making agency. Ensures the seamless organization, evaluation, and management of the grant application review lifecycle. This leads to fair and comprehensive reviews through a standardized process. Helps produce:

› Shorter review timelines

› Transparent and defensible processes

› Improved resource allocation

Program Monitoring

Monitor and track the progress of Grant projects through a centralized location to capture communications, risk assessments, monitoring reviews, site visits, performance reports, and more.

Performance Data Analytics

Data visualizations demonstrate how grant investments impact communities, powered by custom data collections and supported by advanced analytics. Business Intelligence (BI) dashboards develop meaningful analytics that highlight outcomes and impact of the program. BI dashboards allow users to view information at an executive level and quickly drill down into further detail. Custom data collection forms help agencies better understand their grants operations and the outcomes generated by their grant investments.

❯ Visualize Key Performance Indicators to analyze program and recipient performance quickly

❯ Program and Recipient score cards; convert data inputs to program outcomes

❯ Track performance progress and outcomes to assist with program monitoring and oversight

❯ Leverage and incorporate external data sets with performance data to highlight program demographics

❯ Rapid development of new and customizable reports

❯ Capabilities to track goals and outcomes of grant investments

❯ Measurable ROI of grant investments

Program Administration

Program Administration Support performs program administration activities and provide surge support, ranging from application, award processing and post-award management, to peer reviewer support and awardee communications.

❯ Program Administration Activities

❯ Surge Support

❯ Recommendations to improve business processes and workflow

Outreach and Communications

Communications and outreach services help programs "tell the story" of their impact through videos, graphics, webpages, and recipient communications.
